

### **International organizations' meeting with [omissis]**

On Thursday 21 June, 2018 at 12:15 am in [omissis] building, there was a successful meeting including two of INGOs which are working in [omissis], IOM staff and [omissis] representatives, in addition to [omissis], [omissis], CSO representative and [omissis] representative. [omissis] representatives have a meeting in [omissis] as [omissis] declared.

During the meeting, [omissis] stated a brief overview about the current situation and updates on progress about what we have agreed and discussed last meeting on 30 May, 2018. He presented the roles of each organization regarding wastewater issue, and what INGOs have confirmed to provide urgently to the water company to help sloving the problem.

Then, each organization had a chance to explain and update on what are they going to provide and how much time is going to take to provide the required equipment or services.

IOM, confirmed working on 3 sewage trucks and (4) 70Kw pumps as was agreed on last meeting. IOM explained also these equipment are going to take from 2 months to 4 months, approximately, to be delivered to [omissis]. The [omissis] asked if we can accelerate the process urgently due to the high priority and risk of the issue.

[omissis], and on behalf of [omissis] projects, he declared that [omissis] is going to provide two generators very soon, probably by next two weeks. While [omissis], started doing assessments on Sub-lifting stations to start the work as soon as possible. [omissis] will support 4 pumps that need maintenance in [omissis].

INGOs made it clear that, the most important issue is the security situation in the area, and without securing the locations "main lifting station and treatment station" all organizations' support will be useless. [omissis] asked [omissis], [omissis] and others to attend a meeting next Monday with

[omissis] representatives to discuss a strategy on how to secure these locations.

Finally, CSOs representative, [omissis], and [omissis] thank and appreciate all international organizations that are working in [omissis] in this difficult situation and supporting local authorities and provide very necessary needs and services to the city,

The meeting ended at 2:30 pm.
